PREMIUM-1: Premium Product Audit

Steward, walked as Dana: would a director pay $449 a month for this feeling?

A development director at a $1.5M nonprofit, in her first real week.

Question under test: “Would a director pay $449 a month for this feeling?”

OCTOBER 13, 2026

The verdict

Almost. The feeling is 80% there, and the last 20% is all trust.

What Dana felt on her best screens: the morning Thread, the donors list, the giving page, the thank-you drafts, the Connections page: is genuinely premium: calm, plain-spoken, and careful with her donors in a way no incumbent CRM is. Lines like "It never sends anything," "Every number opens: click it to see the rows behind it," and "This is your file. Nothing here was typed by us" are the reason a director would pay $449. That voice is the product's moat.

What would stop her is not the price but three trust breaks: the major-donor profile shows numbers that contradict each other ($6,666.67 average × 12 gifts ≠ $77,500 lifetime), the public volunteer sign-up link is dead, and Ask changed its mind between visits about whether it can summarize a conversation. A director who catches her CRM misadding will not trust it with her board. Fix the nine must-fix items and the answer becomes yes.

How this was run: read this first

- **Four passes, one signed-in browser, sequential.** Desktop walk steps 1–7, desktop walk steps 8–14, phone walk steps 1–7, phone walk steps 8–14, plus a screenshot re-capture round.
- **Scope caveat (important):** the brief asked for the Harborlight demo as `director@harborlight.demo`. The saved browser session was Jonathan's admin account (`jonathan@stewardapp.dev`, ADMIN) in the **TEST STEWARD** demo organization. Every finding below is from TEST STEWARD, not Harborlight. The walk was not re-run under the Harborlight identity.
- **Viewport caveat:** exact 1440px / 390px viewports could not be set with the available automation (six distinct attempts failed for phone). Desktop passes ran at approximately 1440px wide (exact width unverified). The phone passes became a code-assisted responsive audit: desktop observation plus the app's own `@media (max-width: 768px)` stylesheet, with every unverifiable item flagged "could not verify visually." A true 390px device pass is still owed.
- **Time caveat:** the walk environment has no system clock; start/finish times per pass are the worker's estimates. The overall window was 11:16 PM EDT Mon Oct 12 to about 12:05 AM EDT Tue Oct 13, 2026.
- **Screenshot caveat:** the browser's snapshot store prunes to ~50 recent captures and several claimed screenshots never persisted to disk. The final set (14 key screens, in `report-assets/`) was assembled from the captures that survived; three pages (giving page, giving summary, 3-year comparison) were still being re-captured at report time.
- **Hard rules honored throughout:** nothing was sent, charged, or published. The import wizard was closed before saving; the thank-you draft was opened and closed unsent; "Send a test to me," "Turn the schedule on," "Save and publish," and "Email this group" were never clicked. Two clearly labeled test artifacts exist from the walk: a "Premium walk test" call + next step on Emily Jackson (due Oct 17, 2026) and a "Premium Walk Test Group."
- **Board-pack PDF:** generated and downloaded, but the PDF itself could not be rendered visually (navigating to the file crashed the automation; the browser recovered). Its layout is unverified: a human should eyeball it before Dana sends it to a board.

Score table: every screen, one-line verdict

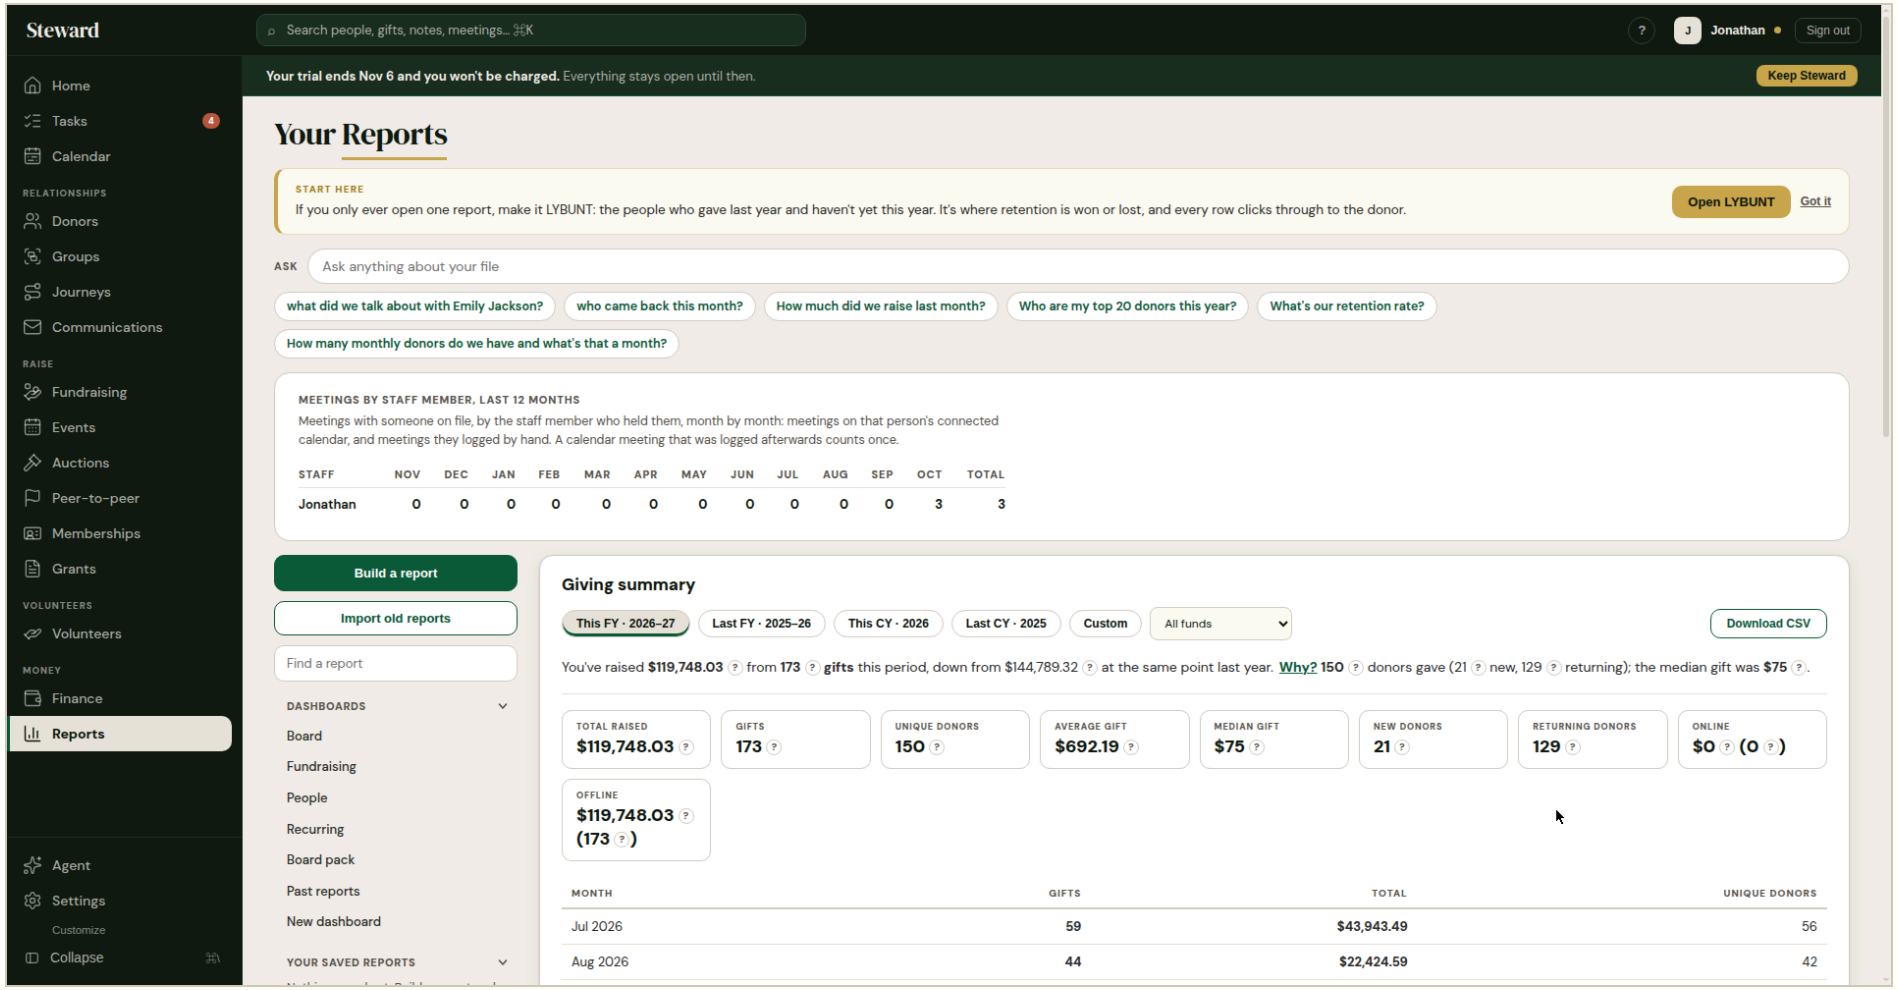

Dimensions: Speed · Obvious next step · Calm · Consistency · Words · Trust · Craft · Delight · What donors see. Donor-facing column is N/A unless the screen is seen by a donor, volunteer, or board member.

Desktop, steps 1–7

Screen	Spd	Next	Calm	Cons	Words	Trust	Craft	Delight	Donor	Verdict
Home (Thread, Drift, readout)	4	5	3	4	4	3	4	4	N/A	The morning screen works; the Drift count moved 7→8 between visits with no explanation.
Donors list	4	5	5	5	5	5	5	3	N/A	Fast, calm, scannable: the list a director lives in.
Emily Jackson (major)	4	5	3	3	3	2	4	4	N/A	Rich, but the math contradicts itself: the trust score this earns.
Susan Lee (lapsed)	4	5	4	3	4	2	3	3	N/A	Same skeleton, same contradictions, plus an empty Attachments default.
Jonathan Atkinson (new)	4	5	4	4	5	4	3	5	N/A	The new-donor journey ("the one that goes cold") is the clearest flow in the app.
Log a conversation	5	5	5	5	3	5	4	4	N/A	The next step lands back on the Thread: the loop closes.
Command palette	5	4	5	4	5	5	4	4	N/A	Grouped, accurate results; the ⌘K hint has no Windows equivalent and Ctrl+K did nothing.
Ask (dialog)	4	4	4	4	4	5	3	5	N/A	Source rows, honest "working it out from your own records": then it changed its mind in a later pass.
Journeys	4	4	3	3	2	4	4	3	N/A	Warmest copy in the walk ("It never sends anything") wrapped around internal tags.
Giving page (donor view)	5	5	5	5	5	5	5	4	5	The most donor-ready surface in the audit: Dana would be proud to send this link.
Events (empty state)	4	4	5	5	5	N/A	5	3	N/A	Clean empty state; two Events entries in the nav.
Groups list	5	5	5	5	2	5	5	4	N/A	Plainspoken: then LYBUNT/SYBUNT appear unexplained.
Group builder	5	5	5	5	5	5	5	4	N/A	Unusually plainspoken and quick.

Desktop, steps 8–14

Screen	Spd	Next	Calm	Cons	Words	Trust	Craft	Delight	Donor	Verdict
Giving summary report	4	5	4	5	4	5	4	4	N/A	The numbers check out ($119,748.03 ÷ 173 = $692.19) and "Why?" is one click away.
3-year comparison	4	5	4	4	4	4	3	3	N/A	Fiscal-year math reconciles: but headers scroll away and one column is dead.
Board pack (+ PDF)	4	5	4	4	5	4	3	4	4*	"Every number defined on the last page" is exactly right; the PDF itself is unverified.
Thank-you queue + draft	5	5	5	4	4	5	5	4	4	Plain, warm, and impossible to send by accident: Dana would send it, then teach it her voice.
Agent: Ask tab	5	5	4	3	3	5	5	4	N/A	Lovely framing ("six specialists… then wait for your yes"), one wrong pronoun, one British cheque.
Agent: Plans	4	4	5	5	5	5	5	3	N/A	A calm empty state that explains the rules before Dana hands over work.
Agent: What changed	4	4	5	5	5	5	5	3	N/A	"Rules and counts only": three words that defuse AI-skepticism.
Volunteers section	4	5	4	3	2	4	4	3	N/A	Solid roster tooling that names a banned competitor in the import line.
Public volunteer page	5	2	5	3	3	2	4	2	2	The sign-up link is broken: Dana would paste a dead link into her newsletter.
Recruitment page editor	5	4	4	5	5	4	5	3	N/A	Friendly builder, but "Not published" with no preview of what volunteers would see.
Finance overview	4	5	4	3	3	5	4	4	N/A	"2 things need you" is the right headline; the copy needs an American proofread.
Month close + QuickBooks panel	5	5	4	4	3	5	4	4	N/A	A month-close checklist that names exactly what's open: with unformatted numbers in the warning banner.
Imports tab	4	4	N/A	4	3	4	3	4	N/A	The Move Report is a beautiful trust artifact; the tab buries how to start a new import.
Import wizard	5	5	5	4	2	4	5	3	N/A	A two-step wizard Dana could finish: but the first screen names four banned competitors.
Settings (Organization)	4	4	4	5	5	5	5	3	N/A	Plain, complete, nothing clever, nothing confusing.
Settings: Connections	4	4	4	5	5	5	5	3	N/A	Boring in the best way: every connection states what it will never do.

SCREENSHOT 16 Giving summary report: "You've raised $119,748.03 from 173 gifts", stat cards including ONLINE $0 (0), month table

Phone lens, steps 1–7 (code-assisted; actual width ~1440px, see caveats)

Screen	Spd	Next	Calm	Cons	Words	Trust	Craft	Delight	Donor	Verdict
Home	4	4	3	4	4	4	4	4	N/A	Strong morning screen; the phone story exists in CSS but was never seen rendered.
Donors list	5	4	4	4	4	4	4	3	N/A	The 9-column table is correctly replaced (not squeezed) by mobile card rows.

Screen	Spd	Next	Calm	Cons	Words	Trust	Craft	Delight	Donor	Verdict
Emily Jackson	4	4	3	3	4	3	4	4	N/A	Phone CSS demotes secondary actions behind "⋯": the number contradictions persist.
Susan Lee	4	4	3	3	3	3	4	3	N/A	On a phone, her unformatted number is untappable.
Jonathan Atkinson	4	4	4	3	4	3	4	4	N/A	The clearest phone-shaped flow in the app; triple-counted lateness.
Log-a-call dialog	5	5	4	4	4	4	4	3	N/A	Becomes a bottom sheet on phones: the right native pattern.
Command palette	N/A	2	N/A	3	3	N/A	N/A	2	N/A	Could not be opened at all: no clickable path on desktop, shortcut-only.
Ask: "who came back?"	4	4	4	3	3	4	3	3	N/A	Answered well, but the answer hides below the fold.
Ask: "Emily Jackson"	3	3	4	2	4	3	3	2	N/A	REGRESSION: quoted the call in pass 1, refused in pass 3.
Journeys	4	4	4	4	5	4	4	4	N/A	The timeline is a horizontal swipe waiting to happen.
Giving page	4	5	5	4	5	5	4	4	5	Already a narrow single column: the most phone-ready surface in the audit.
Events	4	4	5	4	4	4	4	3	N/A	Stat cards go 2×2 per the mobile CSS.
Groups	4	4	4	4	4	4	4	3	N/A	The 12-month strip will need a swipe; confirm containment.

Phone lens, steps 8–14 (code-assisted; actual width ~1440px, see caveats)

Screen	Spd	Next	Calm	Cons	Words	Trust	Craft	Delight	Donor	Verdict
Giving summary	4	4	3	4	4	4	4	3	N/A	Nine stat cards stack; the 14-column meetings table gets its scroll container.
3-year comparison	4	3	3	3	3	3	3	2	N/A	On a phone, a scrolling table without sticky headers makes the numbers meaningless.
Board pack	4	4	4	4	5	4	3	4	4	Board-ready definitions; the PDF downloads blind with no preview.
Thank-you draft	5	5	5	3	4	4	3	4	4	Renders inline (good for phones): but "General Operating" is fund-speak.
Agent: Ask	3	3	4	2	3	3	3	2	N/A	Confirmed: answers render below the fold with no scroll-to-answer. On a phone this reads as broken.
Agent: Plans	5	4	5	4	4	5	4	3	N/A	Simple stacked text; no phone risk.
Agent: What changed	4	4	5	4	5	5	4	3	N/A	Honest empty states; no phone risk.
Volunteers	4	3	3	3	2	3	4	3	N/A	The filter wall is a long vertical stack on a phone.

Screen	Spd	Next	Calm	Cons	Words	Trust	Craft	Delight	Donor	Verdict
Public volunteer page	4	1	4	3	3	1	3	1	1	Still broken: the primary volunteer acquisition path is dead.
Recruitment editor	4	3	4	4	4	3	4	3	N/A	No preview: Dana can't check the phone view before publishing.
Finance overview	4	4	3	4	3	4	4	3	N/A	"Gifts with no fund" ($500,811.46) should be the first thing on a phone, not below the fold.
Month close	4	4	3	3	2	3	2	3	N/A	The checklist survives narrow width; the banner's unformatted numbers do not.
Import wizard	5	4	4	4	3	4	4	3	N/A	On a phone, lead with "choose file": "drop" doesn't exist on touch.
Settings	4	4	3	4	4	5	4	3	N/A	Thirteen tabs scroll horizontally; the trust copy is excellent.
Connections	4	4	4	4	5	5	4	4	N/A	Cards stack cleanly; "It never writes to it" per card is exactly right.

* Board-pack donor-facing score is provisional: the PDF layout was never visually verified.

Ranked punch list

Severity: **must fix** (broken, wrong, or banned) · **should fix** (slow, confusing, inconsistent) · **delight** (would make it special). Ranked by what would stop Dana paying.

Must fix

1. **Major-donor profile math contradicts itself**: Emily Jackson profile. Average gift $6,666.67 × 12 gifts ≠ $77,500 lifetime ($77,500 ÷ 12 = $6,458.33). Room-to-give prose contradicts the annual chart; "LAST MET: Not met yet" sits beside "1 meeting in the last 24 months." A director who catches her CRM misadding will not trust it with her board. *(Screenshot 04)*
2. **Public volunteer sign-up link is dead**: Reach tab hands Dana `…/volunteer/join?token=…`, which opens "This sign-up link is not valid." She would paste a dead link into her newsletter. The primary volunteer acquisition path is broken on desktop and phone alike. *(Screenshot 10)*
3. **Banned competitor names in-product**: the import wizard's source buttons read "DonorPerfect", "Salesforce NPSP", "Bloomerang", "Neon CRM"; the Volunteers import line reads "…Wranglr, Bloomerang Volunteer or a spreadsheet." Migration sources are the most defensible place to name competitors, but the house rule bans competitor names and these are bare buttons, not sentences. *(Screenshots 10, 12)*
4. **Ask answers render below the fold with no scroll-to-answer**: confirmed across passes: the answer appears ~600px down with no "ready" indicator. On a phone this reads as a failed ask: a silent answer is a broken feature. *(Screenshot 09)*
5. **Ask changed its mind about conversation recall**: pass 1 quoted the logged test call verbatim; pass 3 refused: "I can't pull up what was said with Emily Jackson." If it's a deliberate guardrail, say why; if it's a regression, restore it. The cross-pass inconsistency breaks trust. *(Screenshot 09)*
6. **Command palette has no clickable path on desktop**: Meta+K, Ctrl+K, and clicking the search box all failed to open it; the box only focuses. The only path is the ⌘K shortcut, which is Mac-specific. Add an explicit Search button. (Mobile has a dedicated search button, so phone users are fine.) *(Screenshot: search box in any header shot)*
7. **3-year comparison: headers not sticky + dead column**: scrolling the 1,050-donor table loses the year labels entirely, and every row reads "ASSIGNED TO: Not set." On a phone's horizontal scroll, unlabeled numbers are meaningless. Make headers sticky; hide the column when empty.
8. **Month-close banner amounts unformatted**: "3 gifts no payment method (87.50), 57 gifts no fund (46693.95), 11 gifts a cheque with no number (7647.00)". No $ signs, no thousands separators. "46693.95" is unparseable at any width, worse on a phone. *(Screenshot 11)*

9. **"producedOct 12, 2026" missing space**: reported on the board-pack report page in pass 2 ("Jul to Sep 2026· producedOct 12, 2026."). Note: the reports hub card renders it correctly with the space ("Jul to Sep 2026 · produced Oct 12, 2026", screenshot 08), so verify whether the report page and the generated PDF still carry the bug. *(Screenshot 08)*

Should fix

Trust and correctness

- "Everything with [donor]" defaults to the Attachments filter ("No files attached") on all three tested profiles: default to All/Timeline. *(Screenshots 04, 05)*
- Pipeline stage "Steward" reuses the product name: rename to "Ongoing care." *(Screenshot 04)*
- "ONLINE $0 (0)" on the giving summary with no explanation, while the org has a live giving page: reads as a broken integration. If true, say why.
- "Gifts with no fund: 628 gifts, $500,811.46" is ~94% of the year's giving with no context for why so much is unassigned. On a phone it should be the first thing, not below the fold. *(Screenshot 11)*
- Enter-to-submit in the Ask box worked in pass 4 but failed in pass 3: inconsistent; on a phone software keyboard a non-submitting Enter is a dead end. *(Screenshot 09)*
- Ask answer truncated mid-word: "open the retention repor…". *(Screenshot 09)*

Words: jargon, cold copy, and the en-GB sweep

- en-GB spellings across a US nonprofit product: "cheque" → "check" (Agent example "Just got a cheque from Meridian Foundation", Finance "61 gifts came in as a cheque", month-close banner ×2), "organisation" → "organization" (Volunteers error page, Finance "your organisation's own months", Home "Organisations give on their own calendars": visible in screenshot 01), "programme" → "program" (board pack "programme fees").
- "It foots: the rows, the fund totals and the database agree to the cent": bookkeeper jargon Dana won't know → "It checks out: …". *(Screenshot 11)*
- "One file · donors and their giving history · shape auto-detected · stages auto-assigned": "shape auto-detected" is engineer-speak. Also "We detect the shape and build donors…". *(Screenshot 12)*
- "INSTITUTIONAL GIVING: FOUNDATIONS, DAFS, CHURCHES AND BUSINESSES": "DAFS" jargon in a headline; also shouty all-caps. *(Screenshot 01)*
- "Tagged recaptured · gave 2026-10-01 to 2026-10-31 · not deceased": "recaptured" is tag jargon; "not deceased" is blunt. *(Screenshot 09)*
- "Every word reaches her queue, never a donor.": wrong pronoun → "your queue." *(Screenshot 09)*

- "This is a record, not a rollback, undoing an import is not part of this release.": roadmap-speak. *(Screenshot 12)*
- "General Operating" in the thank-you draft is internal fund-speak; donors expect the public fund name. The draft also shows no signature/sender line: confirm what the donor actually receives. *(Screenshot 02)*
- Journeys exposes internals: tags like "has-refused-rows" and "shares-id:D10003"; grammar "1 touch over 1 weeks." *(Screenshot 07)*
- Groups explains LYBUNT/SYBUNT in plain English, then shows "LYBUNT"/"SYBUNT" unexplained anyway. The reports hub START HERE card is fine ("make it LYBUNT: the people who gave last year and haven't yet this year": complete sentence, screenshot 08), but pass 2 found the giving-summary instance cut off mid-word ("haven't yet this"): verify that instance.
- "Log a conversation" (profile) vs "Log a call" (Home Drift rows): pick one label everywhere. *(Screenshots 01, 04)*
- "Wranglr": apparent typo in the Volunteers import line and the import wizard ("A Wranglr or VolunteerHub hours export"). Verify the actual product name. *(Screenshots 10, 12)*
- Placeholder "She asked for the impact report." in the log-a-call dialog reads as pre-filled data: style placeholders distinctly. The morning-email line truncates ("Add a time and it emails you at tha..."): verify no clip in the bottom sheet.
- Missing-space craft bugs: "64 early signs,donors", "Cards failed thisweek", "forSeptember" / "Adding upSeptember" (month close), "From yourA spreadsheetexport" and "your file says969, Steward holds1,049" (imports tab: seen in the accessibility tree; verify the visual render).
- "2 days late" + "day 4" + "Overdue Oct 10" triple-counts lateness on the new-donor journey; "started 2026-10-08" uses an ISO date ("In this journey since 2026-10-08" in the live preview, screenshot 07) while the rest of the app writes "Oct 10".
- Name casing: "Susan ANDERSON" (all caps) vs "Heather Parker" (title case) on the same Home screen. *(Screenshot 01)*
- Phone "7315061544" on Susan Lee's profile is unformatted: on a phone it's untappable; use (731) 506-1544 with a tel: link. (Emily's renders formatted: (929) 650-4776: so this is inconsistent, screenshot 04 vs 05.)
- The imports table is full of "PayPal - checked 2026-10-12 / 0 rows in / 0 gifts created / $0.00" rows: connection health checks listed as imports; separate them from real file imports. *(Screenshot 12)*
- Recruitment page: "Not published" with no preview: Dana can't see what volunteers would see (on their phones) before publishing. *(Screenshot 10)*
- Board pack: no PDF preview before downloading: on a phone, Dana downloads blind. *(Screenshot 08)*
- Giving page: First/Last name side-by-side may squeeze at 390px: stack on narrow; confirm the "test-steward-8065d0" slug is customizable before donors see it.
- "One volunteer on the roster, one of them also gives.": "one of them" for a single volunteer → "who also gives." *(Screenshot 10)*
- The volunteer filter wall (Search, Status, Service area, Role, Availability, Service dates, Min hours...) is a long vertical stack on a phone: consider collapsing advanced filters behind "More filters." *(Screenshot 10)*

- Settings' 13 tabs will scroll horizontally on a phone: usable, but consider grouping.
- Two Events entries in the nav (pass 1); the "We've moved" button label is cryptic until clicked; "Moving from A spreadsheet" capitalizes oddly mid-sentence.

Delight: protect these, then do more of them

- "This is the one that goes cold." (Jonathan Atkinson's overdue thank-you: perfect for a phone glance.) *(Screenshot 06)*
- "It never sends anything." / "Nothing is sent." / "Nothing sends itself.": the safety promise, repeated everywhere it matters. *(Screenshots 07, 08)*
- "This is your file. Nothing here was typed by us." *(Home)*
- "How did it go with Emily?": the Thread remembering the call. *(Home)*
- Ask's source-citation pattern: "Working it out from your own records…" with rows that open. *(Screenshot 09)*
- "Steward does not send this. It goes from your own mail." + "Plain for now. Paste three of your own thank-yous and Steward will write like you.": honest about being generic. *(Screenshot 02)*
- Each Agent specialist lists what it **cannot** do ("It never merges two people itself", "It has no way to send, and no way to change a record"). *(Screenshot 09)*
- The Move Report: "Proof that nothing was lost": YOUR FILE vs IN STEWARD tables, dollars by year, "What differs, exactly." This is the trust pattern the whole app should copy. *(Screenshot 12)*
- "Every number opens: click it to see the rows behind it." *(Screenshot 08)*
- "Rules and counts only. Each one says where it came from." *(Agent: What changed)*
- "It goes to these people and nobody else, and never to a donor." *(Settings: board pack recipients)*
- "It never writes to it." as a repeated, per-card promise on Connections. *(Screenshot 13)*
- "How you look after somebody, written down once and then remembered for you." *(Screenshot 07)*
- "4 of 5 things are still open for this month.": the month-close as a checklist with a count. *(Screenshot 11)*
- "$25 every month until you cancel, $300 a year.": respectful arithmetic on the giving page.
- "They're fine, hide this": the humane dismiss on every Drift row. *(Screenshot 01)*
- "Steward calls them donors. What do you call them?" with "Set your words": the product asking for her language, not imposing its own. *(Screenshot 01)*
- "Teach Steward your voice →" *(Screenshot 01)*

> - "Which volunteers should we ask to give?" with an Ask button: the exact cross-over question Dana has. *(Screenshot 10)*
> - "What happened this month, and what needs you?": the two jobs of a finance page in one line. *(Screenshot 11)*
> - "Nothing planned yet. Tell Steward what happened, in your own words, and it shows you the plan before anything changes." *(Agent: Plans)*
> - "2 things need you." as the Finance headline; "6 connected, 0 need attention." as the Connections headline. *(Screenshots 11, 13)*
> - "Your trial ends Nov 6 and you won't be charged. Everything stays open until then.": the trial banner says the quiet part out loud. (Visible in screenshots 07, 08.)

Every copy rewrite: old and new

23	"Ask the organisation for its current link."	"Ask the organization for its current link."	Volunteer link error page
24	"One volunteer on the roster, one of them also gives."	"One volunteer on the roster, who also gives."	Volunteers

Banned-word scan: **"Bloomerang"** (Volunteers import line; import wizard source button), **"DonorPerfect"**, **"Salesforce"** (as "Salesforce NPSP"), **"Neon"** (as "Neon CRM"): all in migration/import-source contexts, quoted above. No "churn", "users", "leads", "conversion", or "AI-powered" anywhere in the walked UI. No em dashes in UI copy. (QuickBooks, Xero, Stripe, PayPal, Givebutter, Donorbox, Zeffy, Cash App, Venmo appear as integrations, not donor-CRM competitors.)

Three most premium screens

1. **The giving page (donor view)**: 5s across the board, donor-facing 5/5. A narrow single column that is already a phone layout; respectful arithmetic ("$25 every month until you cancel, $300 a year"); calm. This is the surface donors actually touch, and it feels like $449.

SCREENSHOT 15 Giving page (donor view): Monthly/One-time/Annual, amount cards, fee-cover checkbox, designation, name fields

2. **The donors list**: fast, calm, scannable, honest about its width on desktop and correctly replaced (not squeezed) by card rows on mobile. The list a director lives in, with nothing to trip over.
3. **Settings: Connections**: "boring in the best way." Every card states what it does and what it will never do ("It never writes to it"), with "6 connected, 0 need attention" as the headline. This is the page that makes a director trust Steward with her Stripe account.

Three least premium screens

1. **The public volunteer sign-up page**: not a design problem, a broken one: "This sign-up link is not valid." The primary volunteer acquisition path is a dead end (donor-facing 1/5). Nothing else in the walk fails this completely.
2. **Emily Jackson's profile (major donor)**: the richest screen in the app and the least trustworthy: average × count ≠ lifetime, room-to-give vs chart, "Not met yet" vs "1 meeting in 24 months." Trust 2/5 on the screen a director opens before her biggest call.
3. **Agent: Ask**: the answers hide below the fold with no scroll-to-answer, Enter-to-submit is inconsistent, one example says "her queue," one says "cheque," and it quoted Dana's call in one pass and refused to in the next. The intelligence is real; the manners aren't finished.

Ideal version of each worst screen

1. The volunteer sign-up link, fixed. Dana copies the link from Reach; it opens a page with her org's name, one warm line about what volunteers do, three open opportunities, and a short form (name, email, phone, availability). Submitting shows "You're in: [org] will be in touch this week," and the application appears in her Pending applications. The link never goes stale without telling her: if a token expires, Reach says so before she copies it.

2. Emily Jackson's profile, reconciled. The header is unchanged. Average gift, gift count, and lifetime always foot: $77,500 ÷ 12 = $6,458.33, shown as the average, with the count beside it. Room-to-give either agrees with the annual chart or says plainly "Not enough history to estimate." "Last met" shows the actual most recent meeting date (five days ago) instead of "Not met yet." "Everything with Emily" opens on All/Timeline, not Attachments. The pipeline stage reads "Ongoing care," not "Steward." Nothing else moves: the layout is already right; only the numbers need to stop arguing with each other.

3. Agent: Ask, with manners. Answers scroll into view with a "ready" indicator the moment they're done. Enter always submits. "Every word waits in your queue: nothing ever goes straight to a donor." The Meridian example reads "Just got a check from Meridian Foundation for $250." And the conversation-recall behavior is one consistent rule, stated in the UI: either "Ask can summarize your logged calls: every quote opens the call behind it," or "Ask doesn't summarize conversation notes: you'll find every word on the donor's record." Not one on Monday and the other on Tuesday.

For Jonathan's mockup approval: Home and donor-profile layout items

Home (screenshot 01)

- **Thread** (top, partially captured): the day's list; the logged test call returned here as "How did it go with Emily?": the loop Dana lives in.
- **Drift rows**: donor name + one-line story ("Gave about once a year for 3 years, usually around $625. Nothing for 14 months.") + "Engagement 0" + amount at risk ("$625 AT RISK") + "Log the call" button + "They're fine, hide this" dismiss + "Show the other 3" expander. Note: name casing is inconsistent ("Susan ANDERSON" vs "Heather Parker"): pick one.
- **Readout row**: three numbers for a phone glance (captured in pass 1; confirm placement above Drift).
- **Institutional giving**: "FOUNDATIONS, DAFS, CHURCHES AND BUSINESSES" headline (rewrite approved above) + rows (name, amount, last grant/gift date) + the "Organisations give on their own calendars..." note (fix spelling).
- **"Two thank-yous ready."**: "Plain for now. Paste three of your own thank-yous and Steward will write like you." + "Teach Steward your voice →" + rows (name, amount, fund, date, "opened", "Read the draft") + "Steward calls them donors. What do you call them?" with "Set your words" / "Keep Steward's words".
- **Trial banner**: "Your trial ends Nov 6 and you won't be charged. Everything stays open until then." + "Keep Steward": keep this pattern.

Donor profile (screenshots 04, 05, 06)

- **Header**: back button, initials avatar, name (serif), stage chip ("Cultivate"), "Donor since 2022", actions right: "Log a conversation" (rename to "Log a call" to match Home), "Plan a follow-up", "More ▾".
- **Why / What cards**: "Why: Why Emily's giving moved" and "What: What to do next with Emily" side by side under the header.
- **Giving by year chart**: bars per calendar year; caption "Every gift recorded against this record, added by the calendar year it was given in. A bar opens the gifts behind it."
- **Tabs**: Overview · Gifts & Pledges · Funds · Related · Materials · Activity.
- **Overview body**: "Household and relationships: Not in a household" (+ "Group into household"); "Planned giving: Nothing noted" (+ "Note planned giving").
- **Right rail** (dark): NEXT STEP ("Nothing is open for Emily. Plan a follow-up and it appears here, with the day you promised it."), JOURNEY, CONTACT (email, phone: formatted with tel: link), RELATIONSHIP OWNER ("Unassigned" + "Reassign"), CULTIVATION PLAN ("Show").
- **"Everything with Emily"** feed: default tab must be All/Timeline, not Attachments.

Start and finish times

Pass	Window (EDT)
Part 1: desktop, steps 1–7	Mon Oct 12, ~11:16 PM → ~11:31 PM
Part 2: desktop, steps 8–14	Mon Oct 12, ~11:26 PM → ~11:41 PM
Part 3: phone lens, steps 1–7	Mon Oct 12, 11:38 PM → 11:47 PM
Part 4: phone lens, steps 8–14	Mon Oct 12, 11:49 PM → 11:55 PM
Screenshot re-capture rounds	Mon Oct 12, ~11:56 PM → Tue Oct 13, ~12:05 AM

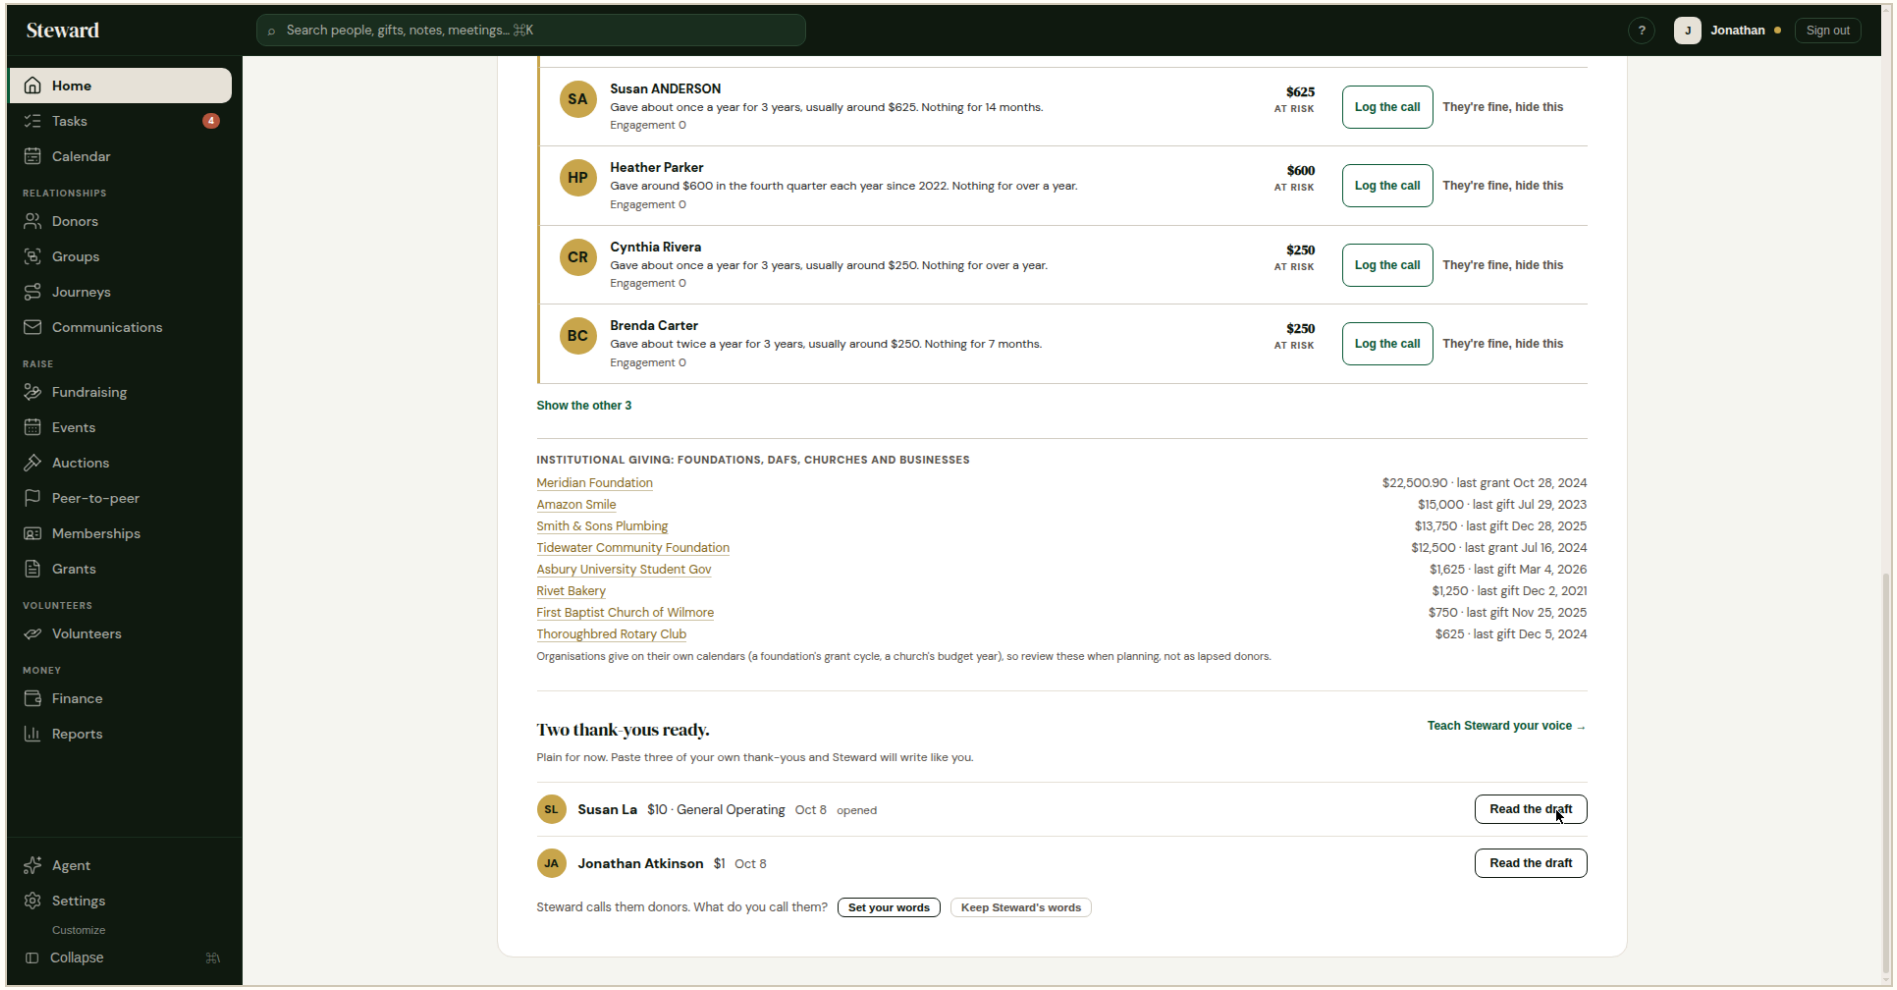

Overall: Mon Oct 12, 2026 ~11:16 PM EDT → Tue Oct 13, 2026 ~12:05 AM EDT. Per-pass times are the walker's estimates (no system clock in the walk environment); small overlaps between reported windows are estimation noise. Total hands-on walk time: roughly 50 minutes.

Screenshot index

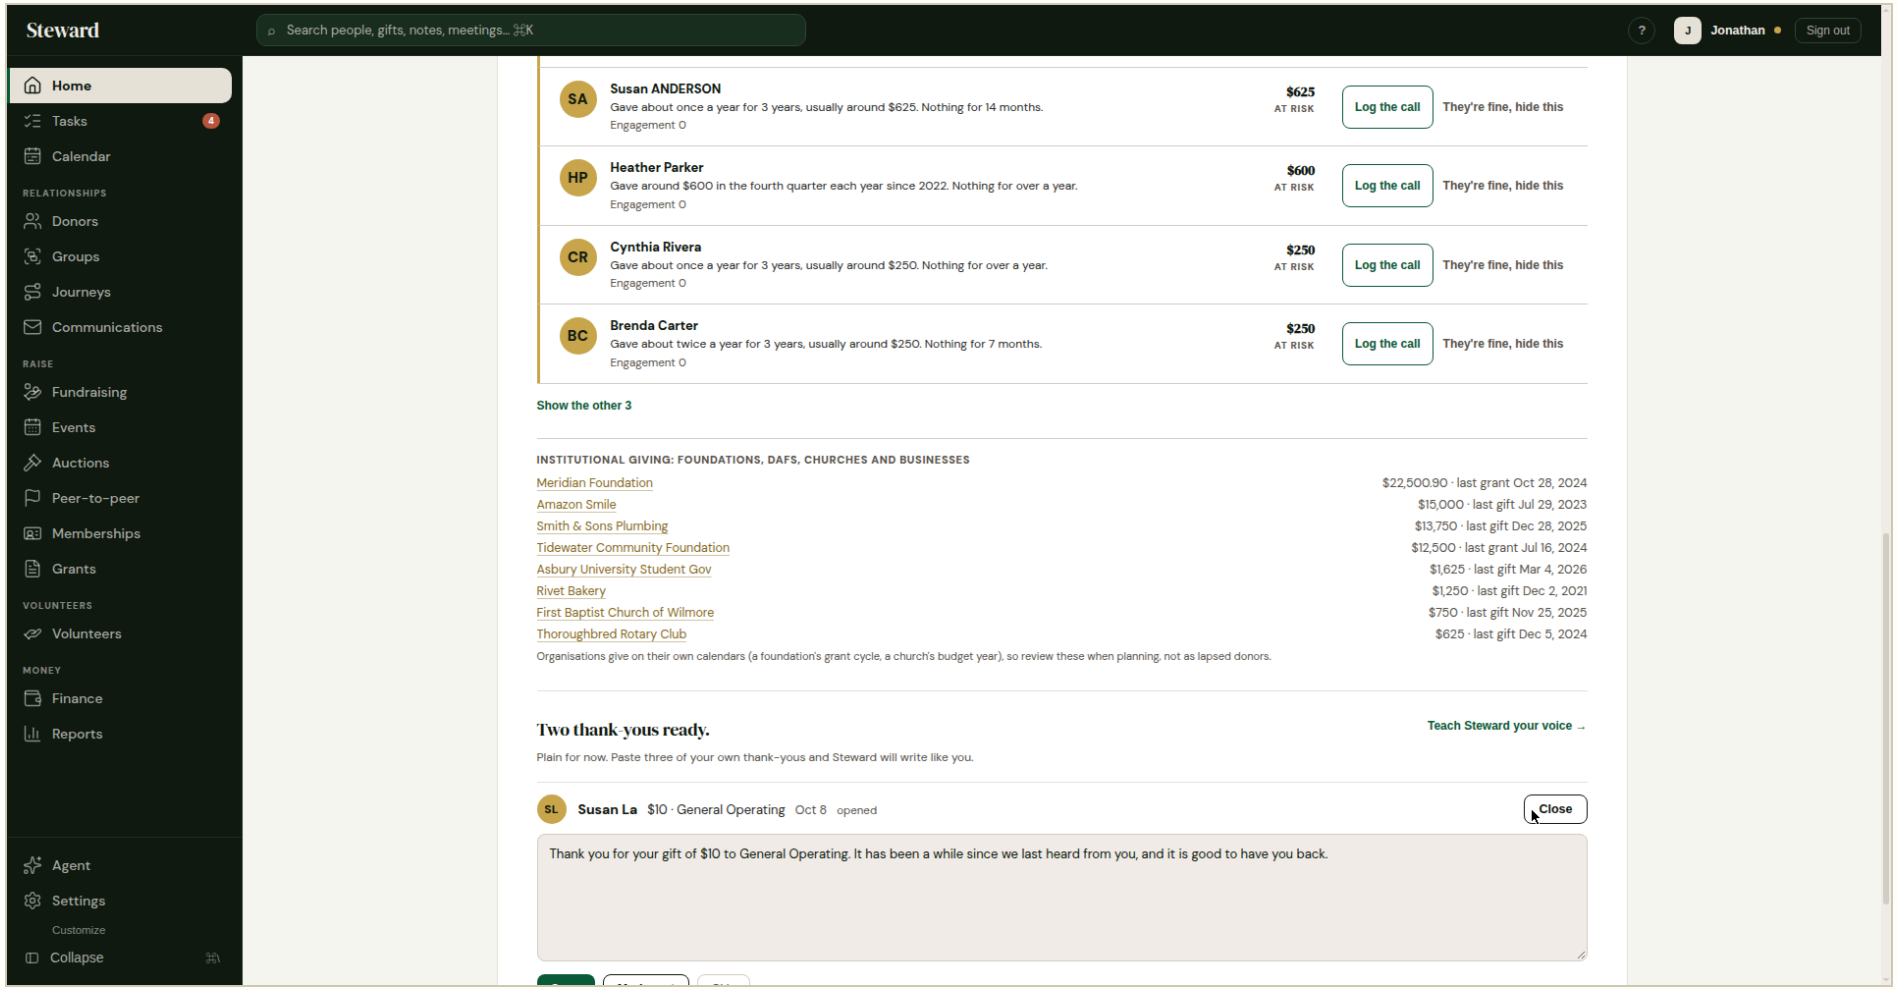

All screenshots are desktop-width captures from the TEST STEWARD demo org, signed in as Jonathan (ADMIN).
